

BioRational Vector Control, L.L.C.

International Mosquito and Sand Fly
Control & Consultation

EXPERTS IN INSECT CONTROL AND PREVENTION

▲ COMPLETE CONTROL TOTAL SUPPORT

Whether you are a resort property, international government agency, property developer, or engineering firm, we can help!

We provide a complete and total package. We assess your property and situation, then build a prevention program from the ground up. We provide equipment, chemicals, and hands on training for you and your staff.

A mosquito and sand fly free environment means happier guests, happier employees, and higher occupancy rates.

✓ Our goal is to protect you and your guests while driving up your profits and ratings.

We also have expertise in rodent and bird control, indoor pest control, and ornamental insect/disease problems.

We use the most effective products which are also cost effective and environmentally friendly.

Methods & chemical application against sand flies and mosquitoes are safe and easy to use. They are within guidelines recognized by international organizations such as the Centers for Disease Control and Prevention, United States Environmental Protection Agency and the World Health Organization.

We stress long term control and complete satisfaction. We recognize the development of insect resistance and implement accordingly to provide you with a program that will evolve and stay ahead of the game for years to come.

▲ EXPERIENCE MULTIDISCIPLINARY TEAM

The BioRational Vector Control team has over 100 years of combined multidisciplinary experience. The team is led by Dan Ariaz who is internationally awarded and recognized for his work in establishing control programs that are highly effective and cost conscious.

Our team works hand in hand with your staff and ensures that they receive knowledge, proper training, and safe handling of mosquito and sand fly control methods.

Our programs are turnkey which are complete and ready to operate.

✓ SAFE, GREEN, &
ENVIRONMENTALLY
FRIENDLY

"I have known Scott Monsen and Dan Ariaz since 2002. Through their company Biorational Vector Control, they have been instrumental in reducing the mosquito and sand fly population in three different resorts (Parrot Cay, Old Bahama Bay and Amanara) in the Bahamas and Turks and Caicos Islands where I am involved with, allowing for an insect free environment for the enjoyment of our guests and owners."

"Scott and Dan has always worked diligently and was sensitive to deadlines, which are important to our operations and have always guaranteed their work. Furthermore, they have trained all my staff to continue with the program and do regular check ups to ensure the effectiveness of the program."

Michel Neutelings
Director
Caicos Resorts Ltd
Amanara Resort, Turks and Caicos Islands

"We have worked with Dan and his team at Biorational for over 7 years. Not only do we find them great fun to work with but also immensely knowledgeable in the field of the control of mosquitoes, sand flies and general insects."

"Our hotel is right on the beach in Antigua with extremely lush vegetation so it is a real challenge to keep an upper hand with the insect population whilst maintaining our philosophy of being an environmentally friendly hotel. I would highly recommend Dan and his team to anyone."
